NEW QUESTION: 1

When designing a WAN that will be carrying real-time traffic, what are two important reasons to consider serialization delay? (Choose two.)

- A.** Serialization delays are variable because they depend only on the size of the packet being serialized.
- B.** Serialization delay depends not only on the line rate of the interface but also on the size of the packet.
- C.** Serialization delays are variable because they depend on the line rate of the interface and on the type of the packet being

serialized.

D. Serialization delay is the time required to transmit the packet on the physical media.

E. Serialization delays are invariable because they depend only on the line rate of the interface.

Answer: B,D

NEW QUESTION: 2

Refer to the exhibit.

A company has an existing Aruba Instant cluster with several Instant APs (IAPs), as shown in the exhibit. The network administrator orders a new IAP and boots it for the first time by connecting it to the PoE switch port shown in the exhibit. What happens after the IAP boots?

A. The IAP attempts to contact AirWave. If it is able to reach AirWave and obtain the current VC (master) IP address, it joins the cluster.

B. The IAP hears the messages from the current VC (master), and it joins the cluster without the occurrence of a new election.

C. The IAP undergoes an election process with the current VC (master). It takes the VC role if it has a higher MAC address unless the current VC is configured as the preferred VC.

D. The IAP fails to join the cluster because the administrator has not yet connected to its Instant SSID and provisioned it.

Answer: A

NEW QUESTION: 3

HOTSPOT

You have a server named Server1 that runs Windows Server 2012 R2.

You are configuring a storage space on Server1.

You need to ensure that the storage space supports tiered storage.

Which settings should you configure?

To answer, select the appropriate options in the answer area.

Answer:

Explanation:
