Be careful, you should only provide your examination report for our check, If NSE5_FMG-7.0 reliable exam bootcamp helps you pass exams and get a qualification certificate you will obtain a better career even a better life.

NEW QUESTION: 1

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: No

Most services go to private preview then public preview before being released to general availability. The private preview is only available to certain Azure customers for evaluation purposes.

Box 2: Yes

Public Preview means that the service is in public beta and can be tried out by anyone with an Azure subscription. Services in public preview are often offered at a discount price.

Public previews are excluded from SLAs and in some cases, no support is offered.

Box 3: No

An Azure service in general availability is available to all Azure customers, not just a subset of the customers.

NEW QUESTION: 2

Your network contains an Active Directory domain named contoso.com. The domain contains the file servers shown in the following table.

A file named File1.abc is stored on Server1. A file named File2.abc is stored on Server2. Three apps named App1, App2, and App3 all open files that have the .abc file extension. You implement Windows Information Protection (WIP) by using the following configurations:

Exempt apps: App2

Protected apps: App1

Windows Information Protection mode: Block

Network boundary: IPv4 range of 192.168.1.1-192.168.1.255

You need to identify the apps from which you can open File1.abc. For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 3

Which two statements about the client-identifier in a DHCP pool are true? (Choose two.)

- A. It specifies a unique identifier that is used only for BOOTP requests.
- B. It specifies a hardware address for the client.
- C. It is specified by appending 01 to the MAC address of a DHCP client.
- D. It specifies a unique identifier that is used only for DHCP requests.
- E. It requires that you specify the hardware protocol.

Answer: C,D

Explanation:

Reference:

client- Specifies the unique identifier for DHCP clients.

identifier- This command is used for DHCP requests.

identifier DHCP clients require client identifiers. You can specify the unique identifier

Example: for the client in either of the following ways:

Device(dhcp- A 7-byte dotted hexadecimal notation. For example, 01b7.0813.8811.66,

config)# client- where 01 represents the Ethernet media type and the remaining bytes

represent the MAC address of the DHCP client.

01b7.0813.8811. A 27-byte dotted hexadecimal notation. For example,

66

7665.6e64.6f72.2d30.3032.342e.3937.6230.2e33.3734.312d.4661.302f.31.

The equivalent ASCII string for this hexadecimal value is vendor-

0024.97b0.3741-fa0/1, where vendor represents the vendor,

0024.97b0.3741 represents the MAC address of the source interface, and

fa0/1 represents the source interface of the DHCP client.

See the Troubleshooting Tip section for information about how to

determine the client identifier of the DHCP client.

Note The identifier specified here is considered for a DHCP client that sends a

client identifier in the packet.
