#### Answer:

Explanation:

**NEW QUESTION: 2**

Sie haben eine Ansicht, die ein Aggregat enthält.

Sie müssen in der Lage sein, die Werte von Spalten in der Ansicht zu ändern. Die Änderungen müssen sich in den von der Ansicht verwendeten Tabellen widerspiegeln.

Sie müssen sicherstellen, dass Sie die Ansicht aktualisieren können.

Was solltest du erstellen?

- A. eine schemagebundene Ansicht
- B. Tabellenwertfunktion
- C. Eine partitionierte Ansicht
- D. Ein DML-Trigger

**Answer: D**

Explanation:

Explanation

When you use the SchemaBinding keyword while creating a view or function you bind the structure of any underlying tables or views. It means that as long as that schemabound object exists as a schemabound object (ie you don't remove schemabinding) you are limited in changes that can be made to the tables or views that it refers to.

**NEW QUESTION: 3**

You are designing a data warehouse with two fact tables. The first table contains sales per month and the second table contains orders per day.

Referential integrity must be enforced declaratively.

You need to design a solution that can join a single time dimension to both fact tables.

What should you do?

- A. Change the level of granularity in both fact tables to be the same.
- B. Merge the fact tables.
- C. Create a time mapping table.
- D. Create a view on the sales table.

**Answer: A**
