It is also known to us that passing the exam is not **Answers OG0-041 Real Questions** an easy thing for many people, so a good study method is very important for a lot of people, in addition, a suitable study tool is equally important, because the good and suitable OG0-041 study materials can help people pass the exam in a relaxed state.

NEW QUESTION: 1

You have an Azure environment that contains the Azure subscription and the virtual networks shown in the following table.

You need to recommend a virtual network peering solution to ensure that the resources connected to any other virtual network. The solution must minimize administrative effort. Which virtual network peering topology should you recommend? To answer, select the appropriate topology in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 2

AD Premium 92 is configured to send email notifications. Which of the following events will trigger an email notification?

A. Azure AD Premium 92 is configured to send email notifications.

B. Enterprise Mobility + Security E5 is configured to send email notifications.

C. Enterprise Mobility + Security E3 is configured to send email notifications.

D. Azure AD Premium P1 is configured to send email notifications.

Answer: A

Explanation:

Explanation

When key events occur in Azure AD Privileged Identity Management (PIM), email notifications are sent. For example, PIM sends emails for the following events:

- * When a privileged role activation is pending approval
- * When a privileged role activation request is completed
- * When a privileged role is activated
- * When a privileged role is assigned
- * When Azure AD PIM is enabled

References:

<https://docs.microsoft.com/en-us/azure/active-directory/privileged-identity-management/pim-email-notifications>

NEW QUESTION: 3

A laptop is recovered a few days after it was stolen. Which of the following should be verified during incident response activities to determine the possible impact of the incident?

- A. Presence of UEFI vulnerabilities
- B. Full disk encryption status
- C. TPM PCR values

D. File system integrity

Answer: B

Explanation:

If the organization have their laptops fully encrypted (FDE), the only thing to be verified is whether the disk is still encrypted and its integrity is preserved (assuming the key used was not leaked).

This would also guarantee that the OS is preserved, since an attacker could not access OS and tamper it.

The problem is that the question does not inform if the laptop was fully encrypted or not.
