Someone around you must be using our PCNSA exam questions, If you happen to be facing this problem, you should choose our PCNSA real exam.

NEW QUESTION: 1
Your network environment includes remote employees.
You need to create a secure connection for the remote employees who require access to your Azure virtual network.
What should you do?
A. Configure a point-to-site VPN.
B. Configure an ExpressRoute.
C. Deploy Windows Server 2012 RRAS.
D. Configure a site-to-site VPN.
Answer: A
Explanation:
New Point-To-Site Connectivity
With today's release we've added an awesome new feature that allows you to setup VPN connections between individual

computers and a Windows Azure virtual network without the need for a VPN device.
We call this feature Point-to-Site VirtualPrivate Networking. This feature greatly simplifies setting up secure connections between Windows Azure and client machines, whether from your office environment or from remote locations.
It is especially useful for developers who want to connect to a Windows Azure Virtual Network (and to the individual virtual machines within it) from either behind their corporate firewall or a remote location. Because it is point-to-site they do not need their IT staff to perform any activities to enable it, and no VPNhardware needs to be installed or configured. Instead you can just use the built-in Windows VPN client to tunnel to your Virtual Network in Windows Azure.

NEW QUESTION: 2

Which statement about how the Cisco ASA supports SNMP is true?
A. SNMPv3 is enabled by default and SNMP v1 and 2c are disabled by default.
B. The Cisco ASA and ASASM have an SNMP agent that notifies designated management ,.stations if events occur that are predefined to require a notification, for example, when a link in the network goes up or down.
C. The Cisco ASA and ASASM provide support for network monitoring using SNMP Versions 1,2c, and 3, butdo not support the use of all three versions simultaneously.
D. SNMPv3 is more secure because it uses SSH as the transport mechanism.
E. All SNMFV3 traffic on the inside interface will be denied by the global ACL
Answer: B
