Not only that, it is also capable of generating various [CRT-403 New Study Notes](#) self-assessment reports to keep track of your progress, Is it a kind of power granted by God?

NEW QUESTION: 1

You have a server named Server1 that runs Windows Server 2012. You have a 3-TB database that will be moved to Server1. Server1 has the following physical disks:

- * Three 2-TB SATA disks that are attached to a single IDE controller
- * One 1-TB SATA disk that is attached to a single IDE controller

You need to recommend a solution to ensure that the database can be moved to Server1.

The solution must ensure that the database is available if a single disk fails.

What should you include in the recommendation?

- A.** Add all of the disks to a single storage pool, and then create a parity virtual disk.
- B.** Add all of the disks to a single storage pool, and then create two simple virtual disks.
- C.** Add each disk to a separate storage pool. Create a mirrored virtual disk.
- D.** Add two disks to a storage pool. Add the other disk to another storage pool. Create a mirrored virtual disk.

Answer: A

Explanation:

A parity virtual disk is similar to a hardware Redundant Array of Inexpensive Disks (RAID5).

Data, along with parity information, is striped across multiple physical disks. Parity enables

Storage Spaces to continue to service read and write requests even when a drive has failed. A minimum of three physical disks is required for a parity virtual disk. Note that a parity disk cannot be used in a failover cluster.

NEW QUESTION: 2

Over the life of your program you've received many change request forms. Some of the change requests have been approved and some have been declined. Where should you record all change requests and their status?

- A. Integrated change control
- B. Program Management Information System
- C. Change log
- D. Change register

Answer: D

NEW QUESTION: 3

Due to financial constraints, an engineer is forced to use WAN edge routers with limited memory. BGP is used to exchange routing information with external customers. Which two additional actions are taken in this design? (Choose two.)

- A. Implement the Maximum-Prefix feature.
- B. Utilize iBGP to reduce memory utilization.
- C. Allow any BGP route that has external customer AS in the AS path.
- D. Filter any BGP routes that were not originated in external customer AS.
- E. Permit only specific routes from the external customers.

Answer: A,E
