- A.** Stellen Sie dem Projektvorstand ausreichende Informationen zur Verfügung, um die nächste Phase zu genehmigen
- B.** Genehmigen Sie den nächsten Phasenplan
- C.** Kontrollieren Sie die Verbindung zwischen dem ProjectManager und den Teammanagern.
- D.** Überprüfen und schließen Sie alle in der vorherigen Phase erkannten Risiken und Probleme

Answer: A

NEW QUESTION: 4

A company has decided to scale its e-commerce application from its corporate datacenter to a commercial cloud provider to meet an anticipated increase in demand during an upcoming holiday. The majority of the application load takes place on the application server under normal conditions.

For this reason, the company decides to deploy additional application servers into a commercial cloud provider using the on-premises orchestration engine that installs and configures common software and network configurations.

The remote computing environment is connected to the on-premises datacenter via a site-to-site IPsec tunnel.

The external DNS provider has been configured to use weighted round-robin routing to load balance connections from the Internet.

During testing, the company discovers that only 20% of connections completed successfully.

Review the network architecture and supporting documents and fulfill these requirements:

Part1:

1. Analyze the configuration of the following components: DNS, Firewall1, Firewall2, Router1, Router2, VPN and Orchestrator Server.

2. Identify the problematic device(s).

Instructions:

If at any time you would like to bring back the initial state of the simulation, please select the Reset button. When you

have completed the simulation, please select the Done button to submit. Once the simulation is submitted, please select the Next button to continue.

Simulation

Answer:

Explanation:

Solution given below with details.
